* Census population of 2001 is used for calculation of case-detection rate

† Case detection rate totals based on districts implementing for more than one quarter. Estimated total new smear-positive cases adjusted for available data on Annual Risk of Infection (ARI) for Kerala (estimated new smear positive cases=50/lakh), Himachal Pradesh (estimated new smear positive cases=115/lakh) and Manipur (estimated new smear +ve cases 100 per lakh). For all other states, estimated total new smear-positive cases=85/lakh.

§ Cure rate and success rate are not expected for states that began implementing RNTCP after third quarter of 2001.
