Population in India covered under DOTS and total tuberculosis patients put on treatment each quarter

Annualized new smear-positive case detection rate and treatment success rate in DOTS areas, 2000-2009*

*Estimated no. of NSP cases - 75/100,000 population per year (based on recent ARTI report)

Revised National Tuberculosis Control Programme
3rd Quarter 2009

Dear Colleagues,

It is my great pleasure to inform you all that RNTCP has continued to achieve the twin objectives of NSP case detection and treatment success rate at the national level during the 3rd quarter, 2009. With this, it is evident that the programme, while consolidating and sustaining its past achievements, is progressing satisfactorily towards achieving the TB related Millennium Development Goals.

RNTCP performance during 3q 09

During the quarter, over 1.83 million suspects were examined, 234,282 sputum positive cases were diagnosed, and 390,420 TB cases were registered for treatment. The annualized total case detection rate is 134 cases per 100,000 populations. With a total of 158,002 new smear positive cases being registered for treatment, the new smear positive TB case detection rate (annualized) for the 3rd quarter 2009 is 72%. In addition to this, 97,853 new smear negative cases, 58,751 new extra pulmonary cases, 52,729 smear positive re-treatment cases and 22,703 re-treatment Others' were also registered for treatment in this quarter. The treatment success rate amongst the new smear positive PTB cases registered in the 3rd quarter 2008 is 87% and the sputum conversion rate of the new smear positive PTB patients registered during 2Q09 is 89%. The default rates among NSP (5.7%), NSN (6.9%) and re-treatment cases (14%) continues to show the declining trend over the past several quarters.

Major Activities during the quarter

Progress in accreditation of Intermediate Reference Laboratories (IRL)

The programme is in the process of establishing a network of about 27 Intermediate Reference Laboratories (IRL), and 16 other labs across the country in a phased manner for diagnosis and follows up of MDR TB patients. The IRLs at Andhra Pradesh, Delhi, Gujarat, Kerala, Maharashtra, Orissa, Rajasthan, Tamil Nadu and West Bengal have been accredited. Besides, three lab in other sectors i.e. CMC Vellore, BPRC-Hyderabad and Hinduja Mumbai are also accredited.

Progress in the DOTS- Plus services for MDR TB cases.

DOTS Plus services for management of MDR TB have been rolled out in the states of Gujarat, Maharashtra, Andhra Pradesh, Haryana, Delhi, Kerala, West Bengal, Tamil Nadu and Rajasthan. In this quarter, 330 MDR TB patients have been initiated on DOTS Plus treatment bringing the total number of MDR TB patients on treatment to 969 in these states.

Progress in the involvement of NGOs and PPs

A National review of NTPC projects sites was done on August 2009. NTPC is providing binocular microscope and laboratory technician at these sites. At 10 project sites NTPC is running DMC cum DOT centers.

The "Partnership for Tuberculosis Care and Control in India" (the Partnership) brings together civil society across the country on a common platform to support and strengthen India's national TB control efforts. A consultation meeting was held in New Delhi on 30 September 2009 where, besides partners, corporate, media and government representatives participated. The objective of the meeting was to share progress, cross-learning and experience in the Partnership; develop a common understanding and agreement among the key stakeholders like government, international agencies, donors, civil societies, corporate bodies, and media on TB care and control in India, and advocacy towards the government and international donor community for increased investment in the wider TB care and control activities in India, including civil society support to TB care and control activities.

Progress in medical College involvement

Four zonal task force meetings were held in the quarter at Bhuvanesar for east zone, Udayapur for west zone, Puducherry for south zone and Agartala for north east zone. Zonal OR committee meeting of all four zones were also conducted in the quarter.

Progress in procurement and drug logistics management

In this quarter, drug logistic management workshops were organized in the state of West Bengal and Jharkhand for the state and district level staff.

Progress in TB HIV Collaborative Activities

Implementation of intensified package for TB HIV in the states of Gujarat and Delhi has been started in this quarter.

Progress in ACSM

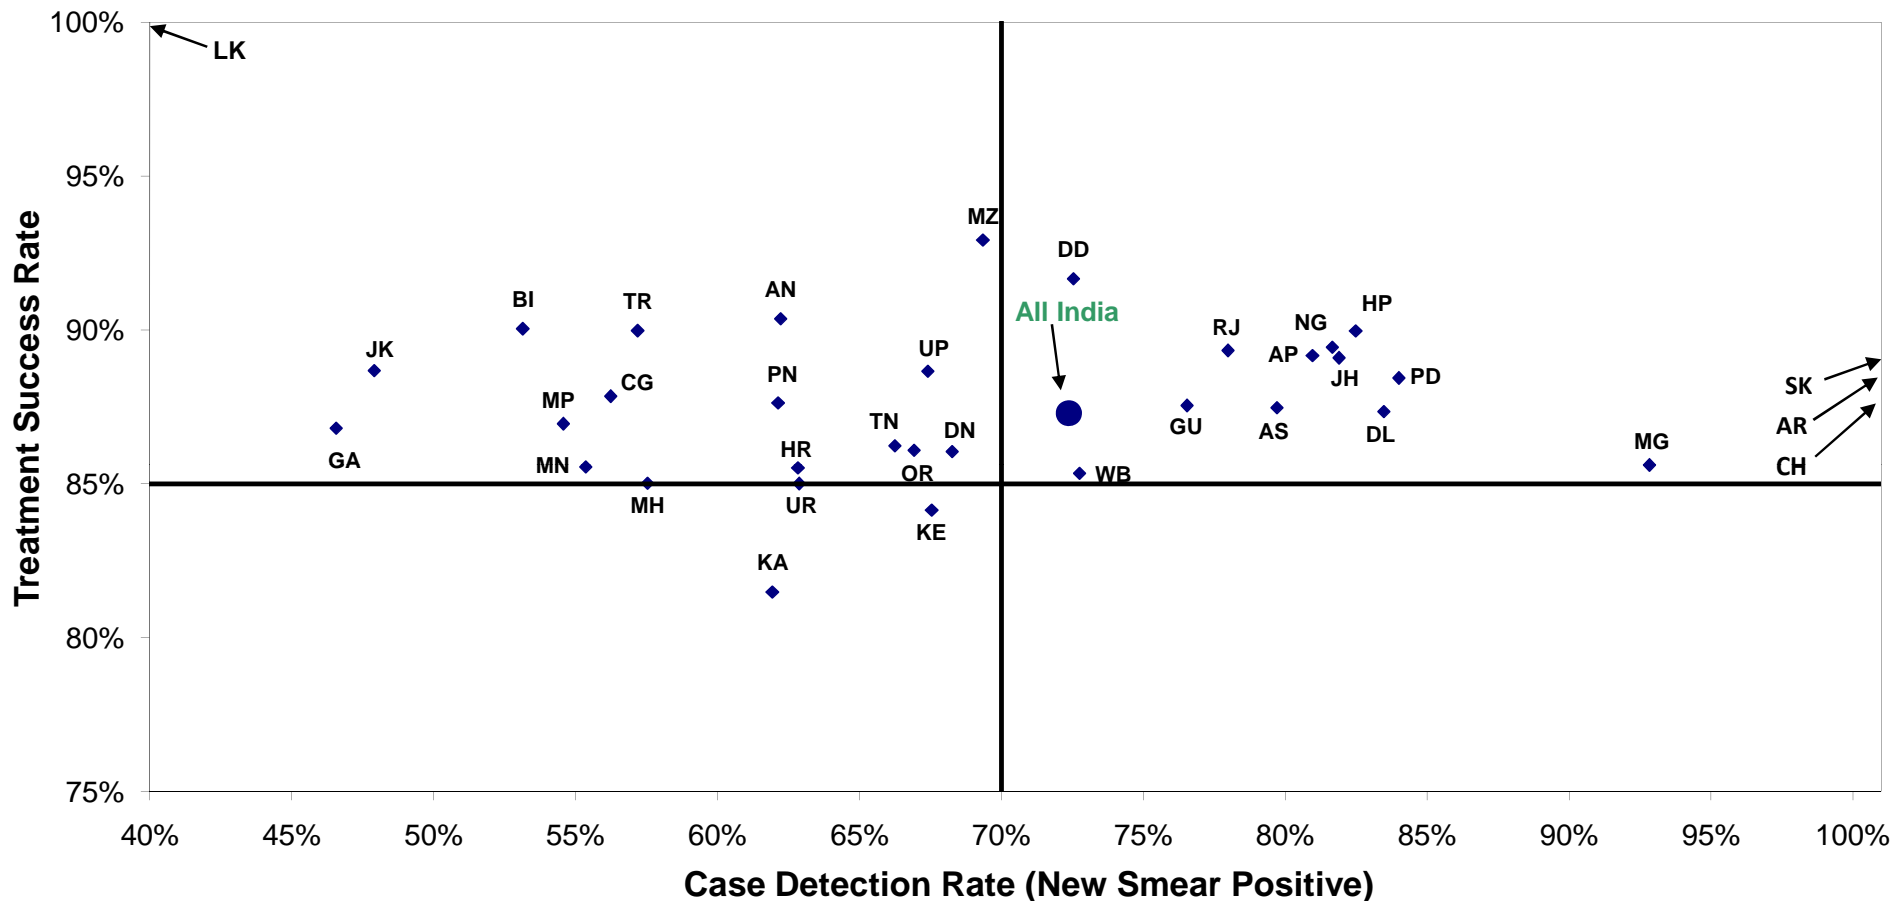

Communication material for community level activities for awareness generation and for use by the DOT providers for patient counselling has been finalized by the media agency, and will be available on RNTCP website by next quarter.

Process of hiring of media agency at the national level is in progress. Technical evaluation of the proposal has been done in this quarter.

RNTCP is in its 12th year of implementation. The programme has initiated DOTS Plus for the treatment of MDR TB. Progress has been made in TB HIV collaborative activities. We are proud of our achievement and at the same time aware of the challenges, especially for rolling out of DOTS-Plus services for the management of MDR TB patients. This requires sustained efforts of committed teams in the states and districts, and at the national level. I am confident that with the dedicated staff in the states and districts, and with the support of the strong team at the Central level, we continue to achieve the targets set out for ourselves and work towards a TB free India.

Estimated New Smear Positive cases / lakh population based on ARTI data for North Zone (Chandigarh, Delhi, Haryana, Himachal Pradesh, Jammu & Kashmir, Punjab, Uttar Pradesh, Uttarakhand) is 95; East Zone (Andaman & Nicobar, Arunachal Pradesh, Assam, Bihar, Jharkhand, Manipur, Meghalaya, Mizoram, Nagaland, Sikkim, Tripura, West Bengal) is 75; South Zone (Andhra Pradesh, Karnataka, Lakshadweep, Puducherry, Tamil Nadu) is 75 and West Zone (Chhattisgarh, Dadra & Nagar Haveli, Daman & Diu, Goa, Gujarat, Madhya Pradesh, Maharashtra, Rajasthan) is 80; Orissa is 85, Kerala is 50

1 Projected population based on census population of 2001 is used for calculation of case-detection rate. 1 lakh = 100,000 population

2 Smear positive patients diagnosed include new smear positive cases and smear positive retreatment cases

3 Total patients registered for treatment includes new sputum smear positive cases, new smear negative cases, new extra-pulmonary cases, new others, failure, TAD and retreatment others
